

Table of Contents

Session 1 – Security and QoS

Secure Scheduling of Wireless Video Sensor Nodes for Surveillance Applications	1
<i>Jacques M. Bahi, Christophe Guyeux, Abdallah Makhoul, and Congduc Pham</i>	
A Hierarchical Deterministic Key Pre-distribution for WSN Using Projective Planes	16
<i>Salbari Mitra, Ratna Dutta, and Sourav Mukhopadhyay</i>	
Towards a Complete Multi-layered Framework for IEEE-802.11e Multi-hop Ad Hoc Networks	32
<i>Rachid El-Azouzi, Essaid Sabir, Mohammed Raiss El Fenni, and Sujit Kumar Samanta</i>	

Session 2 – WSN Development and Evaluation

Towards Realistic and Credible Wireless Sensor Network Evaluation . . .	49
<i>Kamini Garg, Anna Förster, Daniele Puccinelli, and Silvia Giordano</i>	
Adaptive Hierarchical Network Structures for Wireless Sensor Networks	65
<i>Dimitrios Amariatis, Ioannis Chatzigiannakis, Shlomi Dolev, Christos Koninis, Apostolos Pyrgelis, and Paul G. Spirakis</i>	
Algorithms on Improving End-to-End Connectivity and Barrier Coverage in Stochastic Network Deployments	81
<i>Zhilbert Tafa</i>	

Session 3 – Radio and Spectrum Analysis

Collaborative Spectrum Sensing Scheme: Quantized Weighting with Censoring	93
<i>Valentina Pavlovska and Liljana Gavrilovska</i>	
Performance Analysis of Multichannel Radio Link Control in MIMO Systems	106
<i>Jun Li, Yifeng Zhou, Yuanyuan Liu, and Louise Lamont</i>	

Improving Data Dissemination in Multi-hop Cognitive Radio Ad-Hoc Networks 117
Mubashir Husain Rehmani, Aline Carneiro Viana, Hicham Khalife, and Serge Fdida

Session 4 – Mobile WSNs

Cooperative MAC Scheduling in CDMA-MANETs with Multiuser Detection 131
Jun Li, Yifeng Zhou, Mathieu Déziel, and Louise Lamont

MobileR: Multi-hop Energy Efficient Localised Mobile Georouting in Wireless Sensor and Actuator Networks 147
Nicolas Gouvy and Nathalie Mitton

Neighbour Selection and Sensor Knowledge: Proactive Approach for the Frugal Feeding Problem in Wireless Sensor Networks 162
Elio Velazquez and Nicola Santoro

Session 5 – Mobile Ad Hoc Networks

Connectivity of Vehicular Ad Hoc Networks in Downtown Scenarios . . . 177
Shigeo Shioda

An Energy-Delay Routing Protocol for Video Games over Multihops Ad Hoc Networks 193
Arnaud Kaiser, Khaled Boussetta, and Nadjib Achir

Session 6 – Energy

An Energy Analysis of IEEE 802.15.6 Scheduled Access Modes for Medical Applications 209
Christos Tachtatzis, Fabio Di Franco, David C. Tracey, Nick F. Timmons, and Jim Morrison

A Localized Algorithm Based on Minimum Cost Arborescences for the MECBS Problem with Asymmetric Edge Costs 223
Frederico Barboza and Flávio Assis

Author Index 239
